Kindergarten and/or Supporting Beginning Readers (K-1)

August 10-11, Cornwall
"Stepping Stones to Early Literacy"

Location: Regional Board Office
Presenter: Julia Fortin
Target: K-1 teachers

Learn new strategies to help your young readers and writers. Learn to integrate reading, writing, oral language and media literacy. Investigate literacy centers that enhance student learning. Share best strategies to encourage home support.

Kindergarten—ECE

August 18-19, Kemptville
Planned Purposeful Playful!

Location: Kemptville Board Office

Presenter: Nancy Prest
Target: KP, K Teachers and ECE

In this interactive workshop we will discover lots of new ideas for play-based centres, learning through inquiry, high yield strategies to use for large group/small group/individual, cross curricular planning, assessment for instruction and new resources such as Debbie Diller's Spaces and Places, her new Literacy Math Centres and the ETFO "Thinking it Through" collection.

Using Tech to Support Literacy Learning
August 23-24, Smiths Falls
August 25-26, Cornwall

"Flip Your Classroom: Assistive Technology 4 All"

Location: Regional Board Offices
Presenters: Jameson Lee and Farren Hart
Target: 4-6 teachers

Come explore how to shift your approach to teaching and learning with technology. This hands-on workshop will focus on how to differentiate lessons through the use of exciting programs, interactive tools, websites and multimedia. We will demonstrate how to reach all students and support those who struggle using assistive technologies. Practice and exploration will enable teachers to easily integrate technology into any lesson.

MATH

August 23-24, Smiths Falls
August 23-24, Cornwall

CANCELLED

"5/3 of people don't understand fractions, do you?"

Locations: Regional Board Offices

Presenters: Karen Tobin, Stephanie Koekoek
Kathy Pilon and Crystal Lake
Target: 7-10 teachers

Join us as we investigate the wonderful world of fractions. This two day workshop includes an assortment of ways that you can teach fractions to your students. From the hands-on approach of manipulatives to interactive websites, we will explore a number of ways to make fractions and fraction operations fun! Come and join us as we find a common denominator!

MATH

August 18-19, Cornwall

REVISED DATE

"Number Sense Matters!"

Location: Regional Board Office

Presenter: Joe McCooeye
Target: 1-8 teachers

Exploring how students need a deeper understanding of number sense in order to succeed at manipulating numbers. We will look at strategies that can help you and your students add, subtract, multiply, and divide numbers using both manipulatives and mental computation techniques. We will explore resources available online that can help make practicing these skills that much more fun! Other topics of discussion will be providing descriptive feedback in numeracy, planning with Big Ideas in Mind, Numeracy Read-Alouds and more! Come and join us and watch our numbers multiply....
