AI Guiding Principles

To Belong

Equity and Inclusion: Provide equitable access to AI tools which are inclusive and accessible, ensuring everyone feels valued, supported, and represented within our Catholic communities.

To Believe

Faith and Compassion: Use AI in ways which reflect Catholic values, promoting human dignity, respect, and love for all as an expression of Gospel-centred education.

Ethical and Responsible AI Use: Commit to transparency, accountability, and integrity in AI decisions, ensuring technology is always used in service of the common good.

To Nurture

Privacy and Safety: Safeguard personal information, protect confidentiality, and ensure AI practices support a secure and compliant learning and working environment.

Human-Centred Approach: Leverage AI to create space for what only people can offer: empathy, creativity, moral judgment, relationship-building, and the spark of curiosity, resulting in richer environments where growth, innovation, and collaboration are grounded in our shared humanity.

To Learn

Innovation with Purpose: Enrich working and learning with AI by building effective systems that simplify processes, deliver services, and equip staff and students for a changing world while fostering critical thinking and lifelong learning.

Learning and Well-Being: Use AI to enhance creativity, faith development, and holistic well-being.
